FISCAL AND POLICY NOTE  
Third Reader - Revised

House Bill 422  
Health

(Delegate Bagnall, *et al.*)

Finance

---

Public Health - Expedited Partner Therapy - Bacterial Vaginosis and Licensed  
Certified Midwives

---

This bill adds bacterial vaginosis to the list of conditions for which antibiotic therapy can be provided to an individual under the State’s expedited partner therapy (EPT) program. The bill also authorizes a licensed certified midwife to provide antibiotic therapy under the program and replaces the term “sexually transmitted infection” with “an infection transmitted through sexual activity” with respect to the program.

---

Fiscal Summary

**State Effect:** The Maryland Department of Health can update EPT regulations and provider materials with existing budgeted resources. Revenues are not affected.

**Local Effect:** None.

**Small Business Effect:** None.

---

Analysis

**Current Law:** EPT is the practice of providing antibiotic therapy to the sexual partner of a patient diagnosed with certain sexually transmitted infections without an intervening medical evaluation to stop the further spread of the infection and reduce the likelihood of reinfection in the diagnosed patient.

Chapter 183 of 2015 modified the existing Baltimore City EPT Pilot Program to make the provision of EPT a permanent option and authorize the use of EPT throughout Maryland. Physicians, advanced practice registered nurses with prescriptive authority, physician

assistants, pharmacists, and certain registered nurses employed by local health departments may prescribe, dispense, or otherwise provide antibiotic therapy to any sexual partner of a patient diagnosed with chlamydia, gonorrhea, or trichomoniasis without making a physical assessment of the patient's partner.

**Additional Comments:** Bacterial vaginosis is a condition that occurs when there is an imbalance of certain bacteria in the vagina. It can be treated with antibiotics. A recent [study](#) showed that certain male partner treatments for bacterial vaginosis are correlated with reduced recurrence of bacterial vaginosis in the short term.

---

### **Additional Information**

**Recent Prior Introductions:** Similar legislation has not been introduced within the last three years.

**Designated Cross File:** SB 394 (Senator Gile) - Finance.
